Product Brochure

VisNet® CableSniffer²

Faster fault repairs with
fewer excavations

Document Version: V3
UK / 12.07.24

PUBLIC

www.visnet.tech

The VisNet® CableSniffer² is a revolution in underground cable fault location.

Cablesniffer² senses the gasses emitted when an LV fault occurs and cable insulation starts to break down and burn. Field repair teams can quickly locate faults to an accuracy of within 1m by detecting the area with the highest gas concentration, eliminating the need for multiple costly exploratory excavations.

Business Benefits

- Locates faults FAST on all Low Voltage (LV) power cables.
- Accurate to within 1 metre.
- Fewer excavations mean less disruption and reinstatement.
- Improved customer service – faults fixed more quickly.
- Minimal training required.
- Excellent return on investment.
- Calibration reminder.
- User-defined multi language support.
- IP54 rated.

User Features

Proven in the field

CableSniffer² is deployed by network operators throughout the UK to rapidly and effectively pinpoint LV cable faults and minimise customer disruptions.

This means quicker restoration of service for our customers and far fewer holes in the road, with the added bonus of major cost savings. It's a classic win-win solution for everyone concerned.

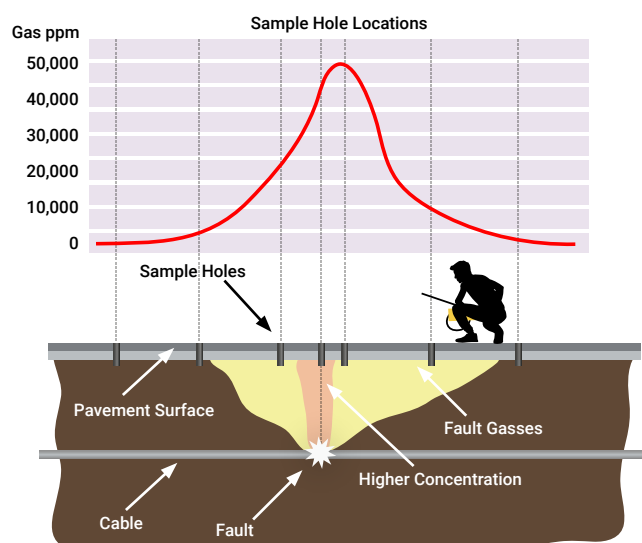

John Morea,
Former Director of Engineering,
Scottish and Southern Energy.

Product Benefits

- Senses gas concentrations as low as 60ppm.
- Precision gas analysis takes the guesswork out of fault location.
- 'No reading' is virtually a guarantee that the cable is not at fault, thus eliminating needless excavations.
- Kit includes sensor probes, spare filter papers, battery charger and carry case.
- Lightweight and portable.
- Easy to use.
- Hydrophobic nozzle and filters to keep water and dust out.
- Accurate and Reliable.

CableSniffer² Fault Identification

Options

CableSniffer² Searcher Bar System

Includes: Sensor Probes, Spare Filter Paper, Battery Charger and Carry Case.

Product Code: CS2-SBS

CableSniffer² Drill System

Includes: Sensor Straws, Spare Filter Paper, Battery Charger and Carry Case.

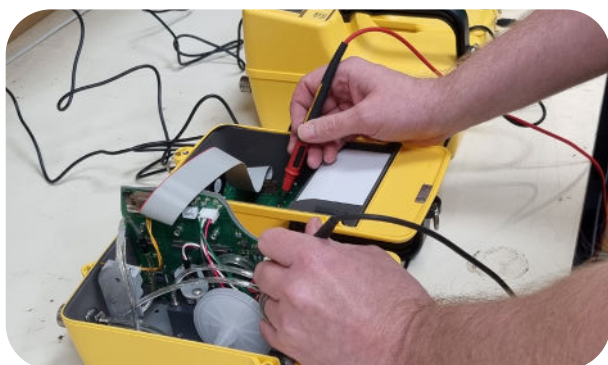

Product Code: CS2-DS

Calibration Service

We recommend annual recalibration of the **CableSniffer²** in our factory.

Product Code: CS2-CAL

Global Support

The **CableSniffer²** can be supplied and supported anywhere in the world, through our network of international sales offices and distribution partners. We provide excellent lifetime support for this system, including:

- Installation and commissioning.
- Training.
- Technical support.
- Online data analysis and reports.
